

EDWARD R. LEAHY JR. HALL BUILDING DESIGN

Leahy Hall contains interactive rehabilitation laboratories, flexible teaching facilities, classrooms, tele-health and research facilities.

In addition, the building seamlessly integrates with McGurkin Hall promoting interaction with related departments in Panuska College – Nursing, Education, Counseling & Human Services, Health Administration and Human Resources. The facility furthers our Jesuit mission and broadens the impact of the Leahy Community Health and Family Center by expanding services to the local community, including pro bono physical and occupational therapy provided by faculty and free developmental screenings for children conducted by occupational therapy students.

About The Design

- ⇒ Designed and constructed in accordance with Leadership in Energy and Environmental Design (LEED) standards for certification
- ⇒ 25 state-of-the-art laboratories, nine traditional and active-learning classrooms, nine group study rooms, more than 50 faculty offices and multiple simulation environments
- ⇒ 116,360-square-feet
- ⇒ Total project costs: \$47.5 million
